

Fair Teams. Now!

EvenlyGreat

Automatic & fair team assignment. For everyone.

The problem: Classic team draws take a long time, are usually unfairly distributed, and depend on one person's subjective judgment. The result: unbalanced games and frustrated members.

The solution: Our app uses an **Elo rating system** (like in chess): every player gets an objective, continuously updated skill rating. This produces **balanced teams** in seconds - no prior knowledge required.

The value for you

Benefit	What this means in practice
Time savings	No more discussions before training - team assignment in seconds.
Fair, motivating games	Balanced teams make for more exciting matches.
Better training	More balanced matches boost training effect and skill development.
Objectivity	Transparent ratings instead of one person's gut feeling.
Easy to use	Interactive, web-based interface - no training required.
Data ownership & security	Full control over your own club and player data.

GDPR-compliant: your data stays with you

- Player and match data never leave your own infrastructure at any point.
- Access protection sits in front of the application - no connection without a valid login.
- Passwords are stored exclusively as hashes, never in plain text.
- Automatic, regular backups for additional resilience.

It's this easy

1

Add players

Add names once, mark who's present.

2

Record results

Enter the result after every match - ratings update automatically.

3

Generate teams

One click is enough: fair, balanced teams are ready instantly.
